

CAPABILITY STATEMENT

Eagle HDD LLC is an environmental drilling company based in Colorado Springs, CO. We specialize in minimally-invasive horizontal directional drilling (HDD), potholing, and light hydro-excavation for government and commercial construction. We have a fleet of specialized equipment and certified operators that have expertise in a wide range of utility installations. HDD is the preferred method for installing utilities underground from **fiber optics, electric, cable, and phone** to **water, irrigation, and lighting**. We use a proven method that significantly minimizes site disruptions and costly site restoration so your project stays on track.

Horizontal Directional Drilling

Trenchless method for installing pipe and cabling for utilities, up to 16" in diameter and 600ft in length.

Potholing

A necessary part of preconstruction planning to verify size, depth, and location of underground utilities.

Hydro Vacuum Excavation

A means of removing soil, debris, and sediments utilizing pressurized water and air vacuum.

We take pride in our work and strive to serve our customers with underground solutions to meet their needs. We invest in our team with continuous technology, tools, and training to provide you cost-effective and competitive solutions. Below are a few of our most recent client projects.

**CDOT Project
SHE 0961-013**

Intersection
Improvements
SH96, Pueblo, CO

**CDOT Project
STR 2871-034**

HDD and potholing,
intersection
improvements,
US 287 Lamar, CO

**CDOT R2
Headquarters**

HDD new fiber optic
communications
Pueblo, CO
